

PAT Testing Service

What is Portable Appliance Testing? (PAT Testing)

PAT testing involves testing all electrical equipment for faults, which may cause accidents and injuries.

Who needs PAT testing?

If you are a landlord or business owner you have a duty of care to your staff or tenants to provide safe electrical appliances.

Items	Cost
Less than 52	£60.00
52 - 99	£1.15 per item
Over 100	90p per item
Over 200	80p per item

**Please note a £20 attendance fee will also be applied and VAT charges may apply.*

PAT Testing Process

PAT testing begins with a thorough inspection of the appliance, a series of tests is then carried out using professional testing equipment.

An appropriate (pass/fail) sticker is then applied to the appliance.

A certificate and asset register is then issued on completion of testing.
